ABOUT US

New Generation Engineering Solutions

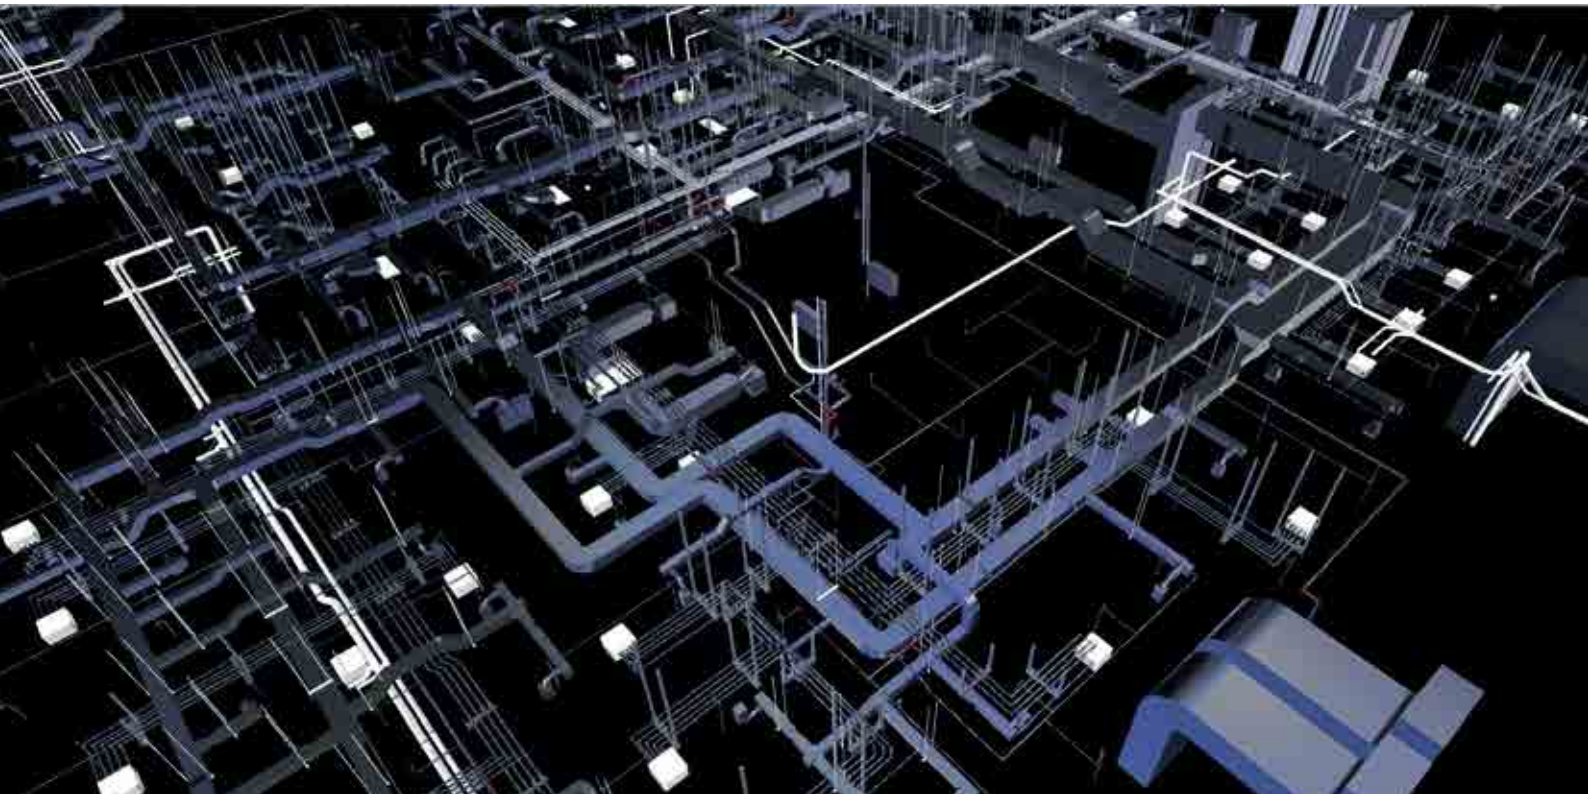

In order to have a greener earth, we have focused on eco-friendly mechanical project design in last years. We believe that we have made a great difference in mechanical installation in our country by training a new generation of young engineers, by using BIM platform design system.

Our company has started to utilize BIM (Building Information Modeling) system using Autodesk Revit, which is using now by US and Europe advanced architecture and engineering companies and was successful to improve the quality of design process.

Evren Demirci
General Manager
